Considerations for Returning to a Healthy Workplace

Workstation Enclosure and Space Delineation

Knoll helps organizations create workplaces that reflect their business objectives and workstyles. We understand that every workplace is different with respect to privacy and enclosure needs, and offer a range of heights, sizes and options for enclosure to meet your organization's evolving requirements. Whatever your approach to planning, our variety of product solutions can help create a workplace that helps your employees feel safe and remain healthy at work.

Knoll

Considerations for Benching

Benching is a space-efficient, flexible platform that can support collaboration work among teams as well as individual focused work. Space delineation can add visual and acoustic privacy, as well as provide additional tackable and writable workspace.

Add Perpendicular Freestanding Gallery Panels

Freestanding gallery panels paired with Antenna Workspaces® intermediate screens on Antenna Workspaces Big Table

Add or Increase Height of Center, Side or End Screens

Antenna Workspaces gallery panels, center and side screens on Antenna® Telescope™

Curved corner k.™ screens on k.™ bench

Considerations for Benching

Add Perpendicular Separation with Storage or Gallery Panels

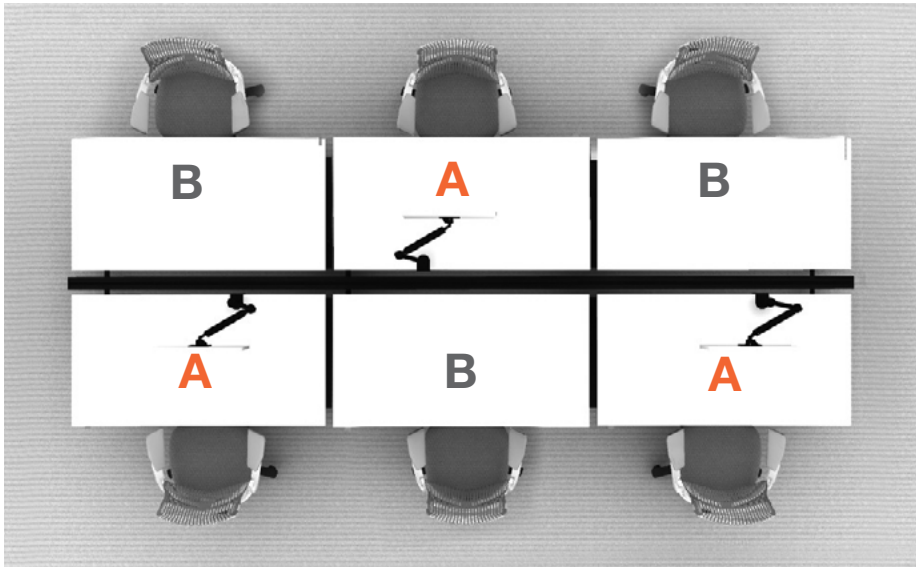
Gallery panels with Antenna Telescope

Anchor™ slide out towers with k.™ bench

Add Storage to Worksurface or Credenzas

Anchor stackers on Antenna Workspaces Big Table worksurface, in combination with upholstered Antenna Workspaces intermediate and glass center screens

Alternate Seats or Work Shifts for Greater Distancing

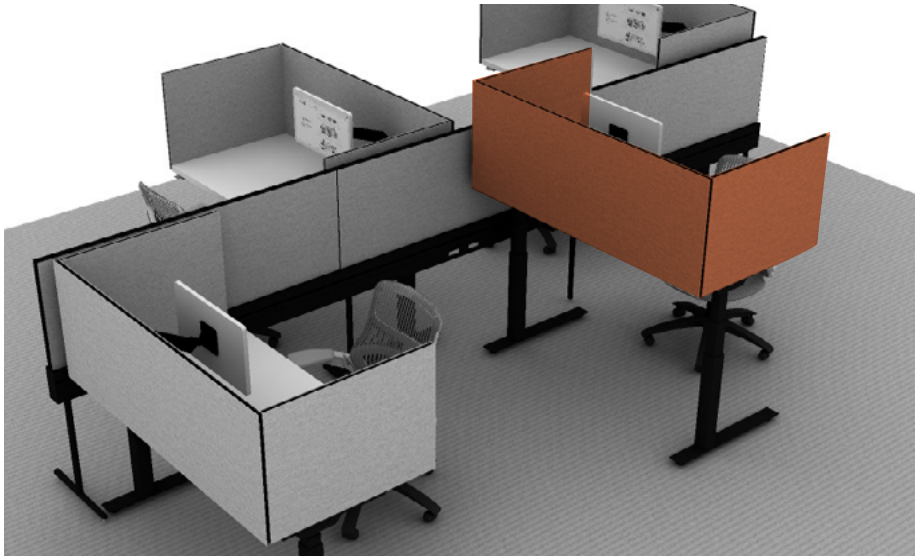


Reduce density and increase separation by alternating office work days for half of the group

Considerations for Height-Adjustable Tables with Technology Spine

The inherent flexibility of freestanding furniture makes tables with technology spine easily reconfigurable to support changing work styles. Tables can be positioned anywhere along the spine, and at any orientation, and screens, panels or storage can be added for increased separation to balance team and individual, focused work.

Add Screens or Increase Height of Existing Desk-Mounted or Spine-Mounted Screens



Network screens on k. stand tables with Antenna® Power Beam and Antenna center screens

Antenna upholstered screens on Tone height-adjustable tables; Antenna glass screens on Fence

Curved corner k. screens on Tone™ height-adjustable tables with Fence.

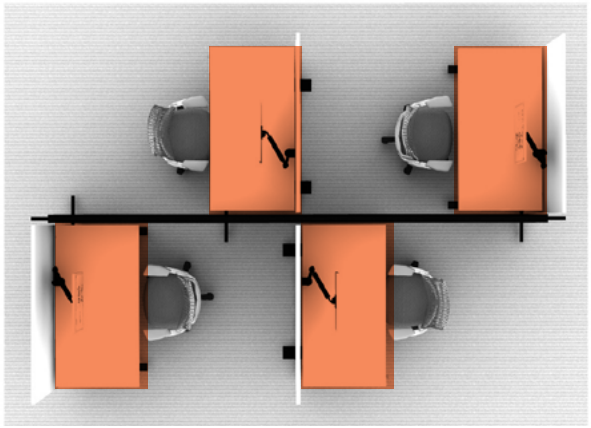
Considerations for Height-Adjustable Tables with Technology Spine

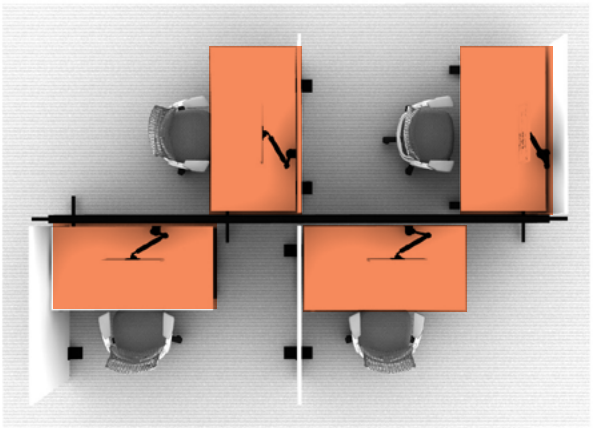
Add Perpendicular Separation with Storage or Gallery Panels

Anchor slide-out towers with Tone height-adjustable tables and Fence

Antenna Workspaces gallery panels with Fence and k. stand height-adjustable tables

Rotate and Stagger Desks for Greater Distancing





Planning Considerations

Engage technology for contact-free adjustment. RIO by Rol Ergo, available on Tone, allows users to set personal preferences and adjust the table from a remote app on their phone.

Considerations for Independent Desks

Freestanding desks offer the most flexible approach to planning, and support on-the-fly reconfiguration. Independent desks can be open for team work, or can easily be surrounded by screens or floorstanding panels as individual desks or groups of desks.

Add Desk-Mounted Back Screens

Upstart® polycarbonite screen on Tone height-adjustable tables

Add Desk-Mounted Surround Screens

Series 2 screens in combination metal and upholstery on k. stand T-leg height-adjustable tables

Custom Antenna Workspaces veneer screens on Tone height-adjustable tables

Considerations for Independent Desks

Add Desk or Standing-Height Enclosure with Panels and Gallery Panels

Dividends Horizon® panels and gallery panels with k. stand height-adjustable tables

Custom-height veneer gallery panel surrounds with Tone height-adjustable tables

Separate Facing and/or Adjacent Desks with Floorstanding Delineation

Rockwell Unscripted® Creative Wall® with k. stand height-adjustable tables

Rockwell Unscripted Creative Wall with k. stand height-adjustable tables

Considerations for Panels

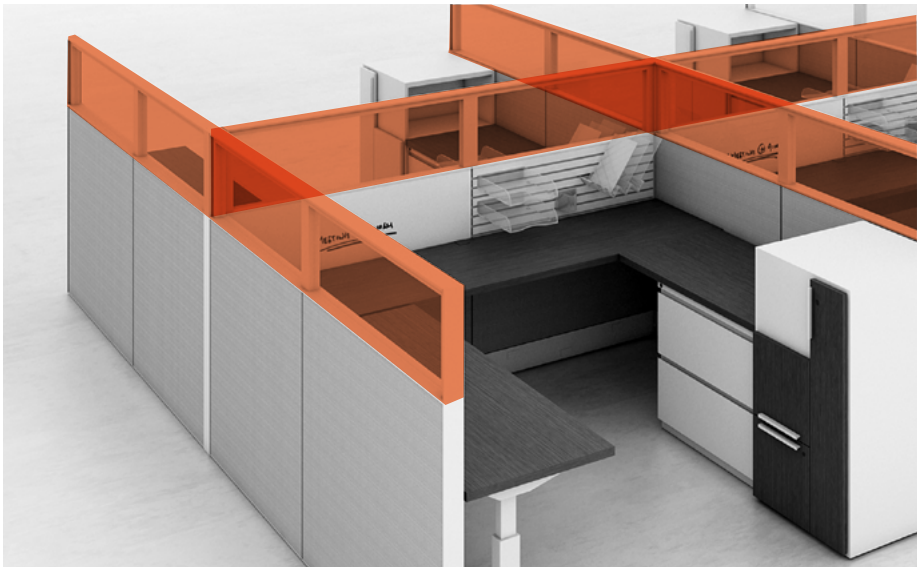
Panels offer fundamental delineation, easily adapt to changing workstyles, and support the needs of an evolving workplace.

Add Screens to Freestanding Desks Within Panels

Dividends Horizon panels with curved corner k. screens on Tone height-adjustable tables

Add Taller Glass or Fabric Panel Stackers to Exisiting Panels

Dividends Horizon panels with frameless glass add-ups



Dividends Horizon panels with glass stacked screens

Considerations for Panels

Add Perpendicular Panels and Returns for Additional Enclosure

Reff Profiles™ panels with frameless glass add-up glass

Dividends Horizon gallery panels

Add Doors

Dividends Horizon rolling door

Planning Considerations

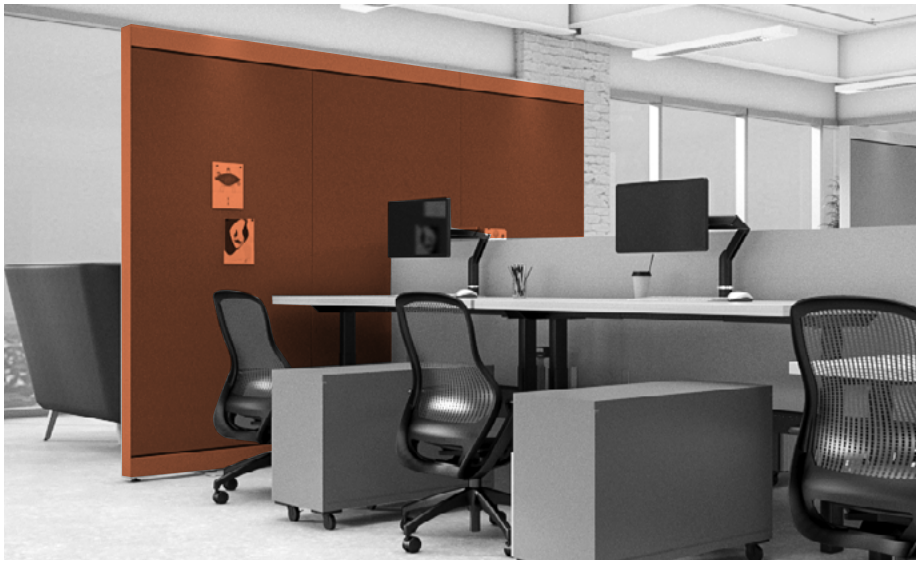
Ease of reconfigurability allows panels to be repositioned so that users can be properly distanced, staggered, or oriented back-to-back.

Fabric panel inserts are easily removable and can be swapped for laminate, steel, or KnollTextiles bleach-cleanable fabrics.

Additional Enclosure Considerations

Vertical space delineation in combination with workstations can add privacy along a corridor, add separation between teams, or enclose individual workspaces.

Add Enclosure Along the Corridor



Rockwell Unscripted Creative Wall separating k. bench

Interpole™ with glass screens enclosing Fence

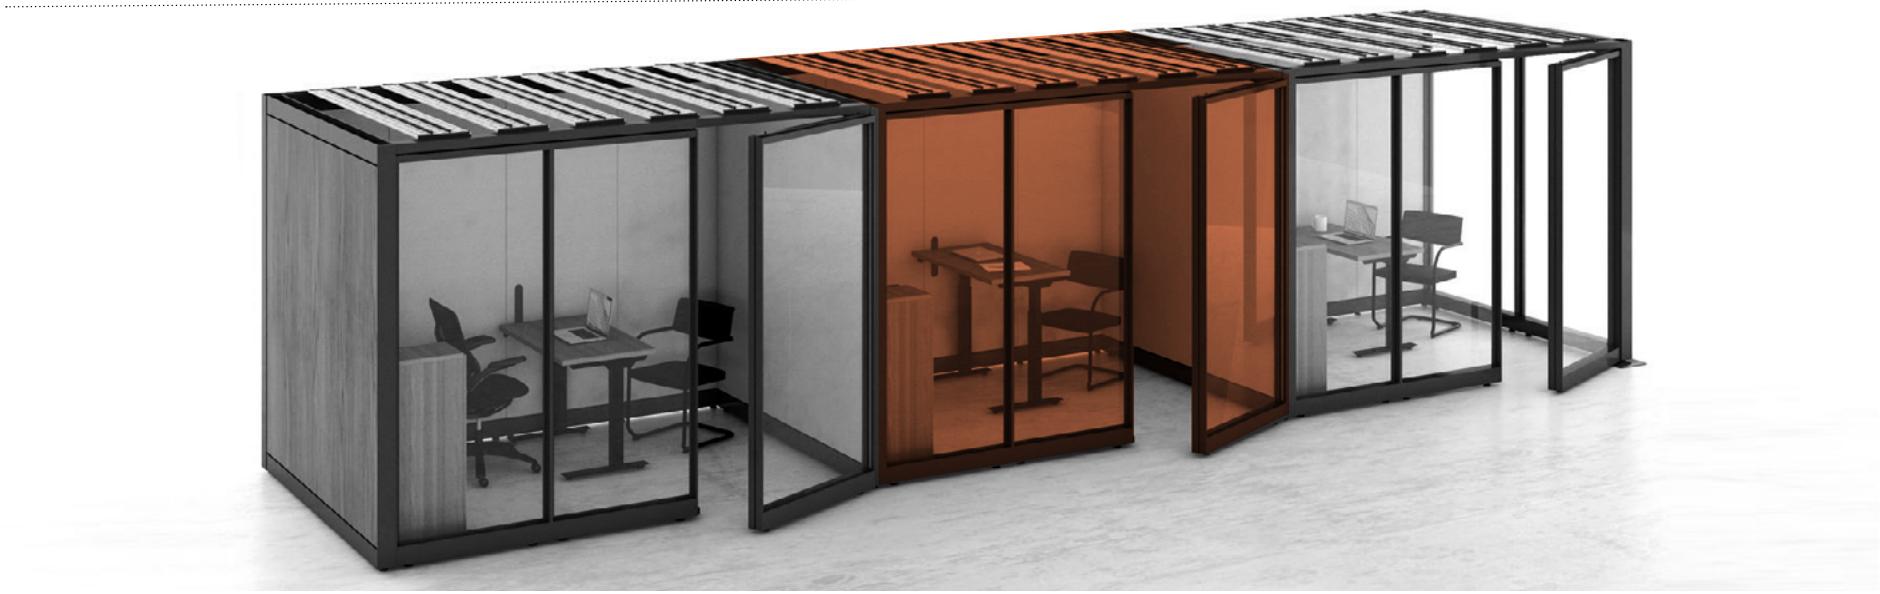
Interpole with markerboard screens enclosing Antenna Big Table

Additional Enclosure Considerations

Create Distinct Zones for Small Teams

Rockwell Unscripted Creative Wall frames

Establish Compact Enclosed Individual Workspaces



Rockwell Unscripted Creative Wall enclosures

Freestanding screens and panels enable temporary, easily reconfigurable space division.
